NNS website Feedback

This feedback document provides a detailed breakdown of the discrepancies between the NNS website and the Wipro reference site, categorized by global elements, functionality, and page-specific issues.

1. Navigation & Global Elements

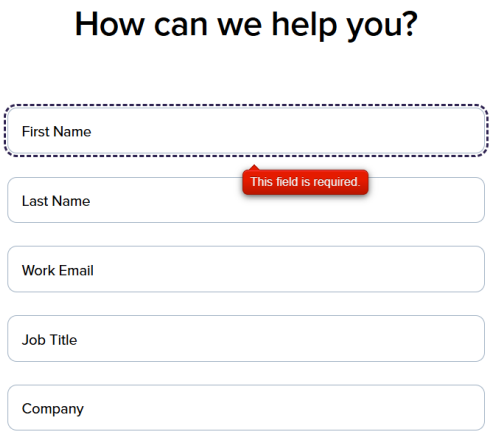
- **Sticky Menu:** Both the main menubar and the second tab/menu bar are currently not sticky and must remain fixed at the top during scrolling.
- **Menu Layout & Design:** * The menu spacing is incorrect and needs to be perfected to match the reference site.
    - Apply a box shadow to the menubar as seen on Wipro.
    - Add missing menu dividers.
    - Correct the margin and padding across the navigation section.
- **Animations & Effects:**
    - The animated down arrow icon is currently static and needs to be functional.
    - Implement smooth transitions and animations for the submenu to improve user experience.
    - Correct the hover div width and ensure submenu text colors and hover effects are applied.
- **Mobile Responsiveness:** The responsive menu is currently non-functional and requires a complete fix.

2. Forms & Functionality

- **Validation & Errors:**
    - Form validation messages do not match the Wipro style.
    - Address and resolve the existing Google reCAPTCHA error.
- **Form Completeness:** Several fields are missing from the current forms and must be added to match the reference site.

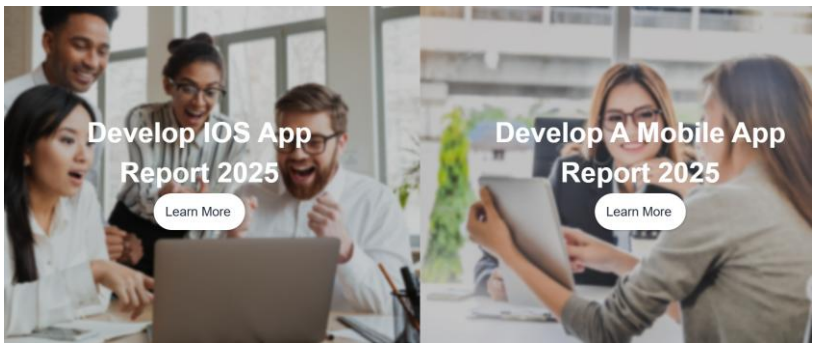
- **Interactive Elements:** * The slider section button (Know More) does not redirect to the intended page.

  - Implement smooth section-loading animations throughout the site.



3. Page-Specific Design Issues

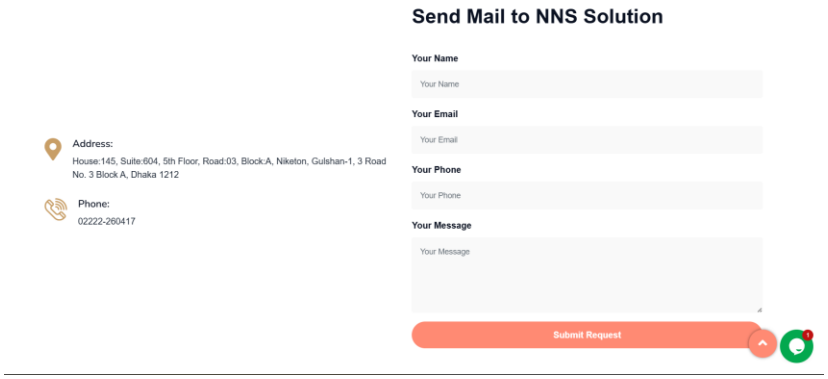
- **Big Div Section:**
  - The "Learn More" button requires a larger top margin.
  - Implement the missing hover text animation for the footer button.

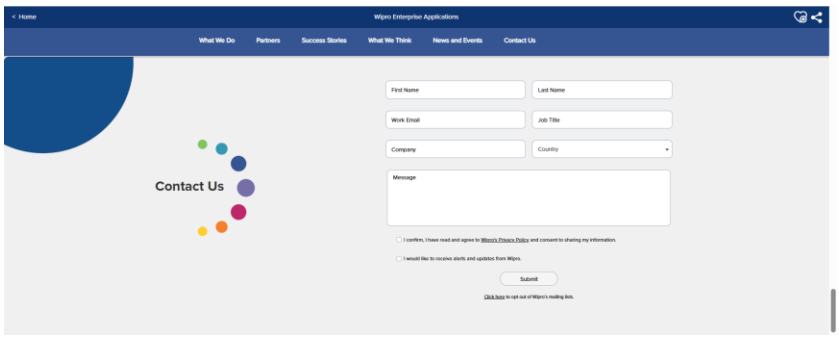


- **Missing Content:**
  - **What-we-think Page:** The page title is currently missing.

  - **Team Page:** Image heights are inconsistent and need to be uniform.

  - **Applications Page:** The contact form design does not match the reference site.





- **Design Mismatches:** The About Us, Case-study, Event, and Career pages all exhibit significant design and functionality discrepancies that need to be resolved.
- **General Improvements:** The Donor-list, Support-ticket, and Clients-feedback pages are currently too basic and require more professional design work.

4. Missing Pages to be Developed

The following pages from the Wipro site are currently entirely missing from the NNS project:

- Inclusion and Belonging
- Investor
- Leadership
- Location
- News
- Partner Ecosystem
- Privacy
- Supplier Diversity
- Innovation Network
- Ventures
- Wellbeing
