SECTION 1: ADMINISTRATIVE INFORMATION

Prime Bank FinTech Limited (PBFTL) hereby invites proposals from qualified and experienced vendors for the development, deployment, and annual maintenance of the PBFTL Official Website (v2.0). This initiative is part of PBFTL's broader digital transformation roadmap, and the selected vendor will be responsible for delivering a secure, scalable, and user-centric website aligned with PBFTL's brand and service vision.

The procurement will be conducted under reference number **PBFTL/RFP/2025/11/001**, and all proposals must be submitted electronically to **info@pbftl.com** no later than **December 21, 2025, by 3:00 PM**. Vendors must ensure that the submitted documents are complete, accurate, and duly authorized.

Any clarification regarding the RFP may be obtained from Mr. Md. Mahmud Hasan Himel, Vice President – Finance & Accounts, email: mahmud.himel@pbftl.com, mobile number: 01676102826 (during office hours).

SECTION 2: INTRODUCTION

PBFTL, an affiliate of Prime Bank PLC, intends to launch a refreshed version of its official website as the central digital platform for customers, partners, and stakeholders. The website will serve multiple purposes simultaneously—brand communication, service awareness, onboarding funnels, B2B engagement, and customer self-help through AI-supported interfaces.

The new website is envisioned to support both current and future PBFTL services and must be designed with extensibility in mind. It must reflect PBFTL's modern positioning in the digital financial services ecosystem and deliver a seamless user experience across both personal and business segments.

All detailed technical, functional, business, security, and architectural requirements are provided in **Annexure-A**, while the commercial structure and pricing template are provided in **Annexure-B**.

SECTION 3: INSTRUCTIONS TO BIDDERS

Vendors are expected to review the RFP carefully and submit a structured response in two parts: a **Technical Proposal** and a **Commercial Proposal**. Technical Proposal must be submitted in soft copy, and if a hard copy is provided, it must match the submitted digital version.

Commercial Proposals must remain valid for a minimum of **90 days** from the submission deadline. Any request for clarification must be placed in writing within the stipulated query period. PBFTL reserves full authority to accept or reject proposals, request supplementary documentation, or modify the RFP timeline if required.

To ensure compliance, bidders must include all required legal and corporate documents, along with information on their organizational structure, technical team profiles, past performance, and experience in the financial sector.

Hardcopy submission address**: Prime Bank FinTech Limited, Prime Aspire (Level 3), CES(A) 48 (Old 98/A) Gulshan Avenue, Dhaka1212.**

SECTION 4: BIDDER QUALIFICATION CRITERIA

To participate in this engagement, the bidder must be a legally registered Bangladeshi entity with an established presence in the local ICT sector. The firm must demonstrate at least **five years of professional experience** in website development and should have successfully delivered similar solutions for **a minimum of three Banks or Financial Institutions**.

PBFTL requires assurance of technical capacity; therefore, vendors must have **at least ten full-time ICT professionals** with skills in system analysis, UX design, frontend and backend development, CMS configuration, integration, testing, and implementation.

The vendor is also expected to demonstrate familiarity with secure coding practices, modern web architecture, and cross-platform performance optimization. Relevant work orders, website links, and evidence of past projects must be provided.

SECTION 5: PROJECT OVERVIEW & CORE MANDATES

PBFTL's upcoming website is intended to be a flagship platform that communicates its brand values while serving as a functional gateway for end users. The project must follow PBFTL's internal strategic guideline known as the **70/30 Principle**—where the website prioritizes actionable functions such as onboarding, lead generation, self-service tools, and information discovery, while still ensuring the remaining informational content is presented clearly and professionally.

The website should reflect innovation, a distinctive identity, and a design philosophy that differentiates PBFTL from conventional financial service providers. It is expected to support both B2C services and B2B engagements through structured funnels for merchants, corporates, educational institutions, suppliers, microfinance institutions, and agents.

Self-service capability is considered a critical component of the website. The platform must support AI-driven customer assistance, dynamic search, structured FAQs, geolocation-based service lookups, and other features that help reduce customer support dependency.

The website must adopt a modern multi-page architecture, be mobile-first, support high accessibility standards, and maintain strong compliance with regulatory and security standards applicable to Bangladesh's financial technology sector.

All granular requirements—page-wise structures, backend capabilities, admin panel expectations, CMS workflows, ticketing functions, AI integration, lead management, security specifications, performance standards, and testing conditions—are explicitly defined in **Annexure-A**.

SECTION 6: EVALUATION CRITERIA

PBFTL will evaluate proposals based on both technical strength and commercial competitiveness. The technical evaluation will carry **70% weight**, focusing on alignment with PBFTL's requirements, UX/UI

approach, robustness of the proposed architecture, CMS and backend capabilities, vendor's experience with financial institutions, resource quality, and feasibility of the implementation plan.

The commercial evaluation will carry the remaining **30%**, assessing cost transparency, pricing structure, AMC charges, and the proposed man-day rates for future change requests.

The final selection will be made based on combined scoring and compliance with PBFTL's procurement policies.

SECTION 7: CONFIDENTIALITY & IP OWNERSHIP

The Vendor/Supplier shall ensure strict confidentiality of any and all information that is received from PBFTL or becomes known as a result of the scope of work, including but not limited to, trade secrets, technical know-how, personal information, algorithm, source code, blueprints, clientele. The confidentiality obligation shall survive perpetuity even if the Vendor/Supplier no longer provide any service to PBFTL.NDA / confidentiality clause

All copyrights, trademarks, service marks, software, content, features, functionality, text, graphics, logos, button icons, images, audio clips, software, data compilations, and the design, selection, and arrangement thereof under the services of Prime Bank FinTech Limited are the exclusive property of Prime Bank FinTech Limited or its licensors and are protected by Bangladeshi and international copyright, trademark, patent, trade secret, and other intellectual property or proprietary rights laws. Any person and/or entity other than PBFTL shall not copy, modify, distribute, or reproduce any part of the services of PBFTL or use it for any unauthorized purpose without written consent from PBFTL. Intellectual property ownership must remain with PBFTL

Upon completion, **all intellectual property**, including source code, documentation, UI/UX assets, workflows, and data structures, shall remain the exclusive property of PBFTL. The vendor must not reuse or repurpose any PBFTL-specific modules for other clients.

SECTION 8: CHANGE MANAGEMENT & Support Expectations

Any modification beyond the agreed scope must follow a structured Change Request (CR) process. Vendors shall provide an impact analysis—covering timelines, cost, and technical implications—within **48 hours** of receiving a CR request. Execution may only begin after formal approval by PBFTL.

Man-day rates must be clearly stated in the commercial proposal as outlined in **Annexure-B**.

All post-go-live support, response timelines, maintenance obligations, and operational performance requirements shall be governed by the Service Level Agreement (SLA) attached as ***Annexure – SLA***.

SECTION 9: PROOF OF CONCEPT (POC)

PBFTL may request shortlisted vendors to present a limited Proof of Concept (POC) to demonstrate their design direction and understanding of requirements. The POC may include a draft homepage layout, sample service page structure, help-hub concept, and an indicative B2B lead submission flow.

ANNEXURE – A: FUNCTIONAL, TECHNICAL & BUSINESS REQUIREMENTS

The website will contain the following modules and functions, and it may be updated/changed on PRIME BANK FinTech Ltd. requirements. Vendor's feedback on the requirements will be as following in the Feedback column bellow for each requirement:

FC – **Fully Comply** with the requirement mentioned here in this document. The standard version of your proposed solution is fully capable of giving the required functionality without any customization.

PC – **Partially Comply** with the requirement mentioned here in this document. The standard version of your proposed solution needs some modification which will be done with no additional Cost. The complete and fully comply module will be the result.

NC – **Not Comply** with the requirement mentioned here in this document. The standard version of your proposed solution does not have this functionality and is not a standard. This functionality is not supported by the vendor and will not be part of any future version or release.

NA – Not Available. The standard version of your proposed solution does not have this feature or function. A customization is needed on some current modules functionality which will be available with additional cost and time to deliver. This will be considered as customization. This will also be part of standard support (SLA) once implemented and will be part of new release.

In your feedback to each functionality, if necessary, please add comments. You can also share additional value adding features which is not detailed here in the main list of functionality/features required for the proposed solution.

A. DESIGN PRINCIPLES & GLOBAL REQUIREMENTS

Req. ID	Requirement Description	Vendor Feedback (FC/PC/NC/NA)	Comments
A-01	Compliance with **70/30 Principle** where 70% focuses on user action/engagement and 30% on information		
A-02	Innovative, distinctive website design that differentiates PBFTL from competitors		
A-03	Multi-Page Application (MPA) architecture		
A-04	Mobile-first responsive design across all devices		
A-05	High accessibility compliance (preferably WCAG 2.1 AA)		

Req. ID	Requirement Description	Vendor Feedback (FC/PC/NC/NA)	Comments
A-06	High-performance, scalable, secure web infrastructure		
A-07	Global Header with PBFTL logo, navigation & download CTA		
A-08	Global Footer with full sitemap & support information		

B. FRONT-END FUNCTIONAL REQUIREMENTS

1. Services Page (Personal Hub)

Req. ID	Requirement Description	Vendor Feedback (FC/PC/NC/NA)	Comments
B-01	Master hub for all B2C services		
B-02	Clear service descriptions		
B-03	Fees & Limits tables		
B-04	Step-by-step "How-To" guides		
B-05	Service-specific FAQs (accordion-based)		

2. Campaign / Offers Page (Engagement Hub)

Req. ID	Requirement Description	Vendor Feedback (FC/PC/NC/NA)	Comments
B-06	Dynamic grid of campaigns & offers		
B-07	**AI Semantic Search bar** (mandatory)		
B-08	Filters by service or partner type		
B-09	Offer detail modal including full Terms & Conditions		

3. Business Page (B2B Action Hub)

Req. ID	Requirement Description	Vendor Feedback (FC/PC/NC/NA)	Comments
B-10	Dedicated sub-sections: Merchant, Corporate, Payroll, Education, Microfinance, Supplier, Agent		

Req. ID	Requirement Description	Vendor Feedback (FC/PC/NC/NA)	Comments
B-11	Lead generation forms integrated into each B2B category		
B-12	Partner campaign request submission form		
B-13	Integration with admin workflow and dashboard		

4. Help & Self-Service Hub

Req. ID	Requirement Description	Vendor Feedback (FC/PC/NC/NA)	Comments
B-14	Centralized self-service dashboard		
B-15	Agent locator (interactive map)		
B-16	Distributor locator		
B-17	Charge calculator		
B-18	Smart Calculator		
B-19	Complaint Cell form		
B-20	Smart Ticketing System		
B-21	Extensive categorized FAQs		
B-22	Security Hub		
B-23	Account management guides		
B-24	Charge & Limits master page		
B-25	Rewards information		
B-26	PIN Reset guide		
B-27	Fraud Awareness contents		
B-28	Discontinued Agent list		
B-29	Discontinued Distributor list		
B-30	Non-compliant Agent list		
B-31	Non-compliant Distributor list		

5. Corporate Pages

Req. ID	Requirement Description	Vendor Feedback (FC/PC/NC/NA)	Comments
B-32	About Us page with Mission, Vision, Values		
B-33	PBFTL Story & Profile		
B-34	Leadership Team		
B-35	Career section		
B-36	Blog (PBFTL Learn) with SEO-optimized posts		
B-37	Contact Us page with form, map & hotline		

C. AI & AUTOMATION REQUIREMENTS

Req. ID	Requirement Description	Vendor Feedback (FC/PC/NC/NA)	Comments
C-01	AI Chatbot with context-aware assistance		
C-02	AI Semantic Search using Elasticsearch / Vector DB		
C-03	Chatbot → Smart Ticket escalation capability		
C-04	Vendor must prepare complete AI knowledge base (FAQs, services, offers, help content)		

D. BACKEND & ADMINISTRATIVE FEATURES

Req. ID	Requirement Description	Vendor Feedback (FC/PC/NC/NA)	Comments
D-01	Admin dashboard with role-based access		
D-02	Real-time analytics dashboard (Source public IP address, geo location tracing. Traffic monitoring etc.)		
D-03	Submission management for all forms		
D-04	Approval workflow (Maker–Checker) for partner campaigns		
D-05	Lead Management System with assignment, routing & status tracking		
D-06	Lead analytics including conversion tracking		

Req. ID	Requirement Description	Vendor Feedback (FC/PC/NC/NA)	Comments
D-07	Export APIs (JSON/CSV)		
D-08	reCAPTCHA v3 integration for all forms		

E. CONTENT MANAGEMENT SYSTEM (CMS)

Req. ID	Requirement Description	Vendor Feedback (FC/PC/NC/NA)	Comments
E-01	Easy-to-use CMS for Blog, Campaigns, FAQs, Service pages		
E-02	Version control for all content		
E-03	Draft → Review → Approve → Publish lifecycle		
E-04	Role-based CMS permissions		
E-05	Automatic image optimization & resizing		
E-06	Scalability for multilingual content		

F. TECHNICAL, SECURITY & PERFORMANCE REQUIREMENTS

Req. ID	Requirement Description	Vendor Feedback (FC/PC/NC/NA)	Comments
F-01	OWASP Top 10–compliant secure development		
F-02	Mandatory VAPT before go-live		
F-03	TLS 1.2+ for all endpoints		
F-04	AES-256 encryption for stored data		
F-05	Defense against CSRF, XSS, HSTS, CSP		
F-06	Dedicated Staging & UAT environments		
F-07	CDN integration for performance		
F-08	Page load target < 2.5 seconds		
F-09	Server response time < 200ms		
F-10	Google Lighthouse Score ≥ 85		

Req. ID	Requirement Description	Vendor Feedback (FC/PC/NC/NA)	Comments
F-11	Load testing for 10,000 concurrent visitors		
F-12	On-page SEO, Sitemap.xml, robots.txt, schema markup		

G. QA, TESTING & DOCUMENTATION

Req. ID	Requirement Description	Vendor Feedback (FC/PC/NC/NA)	Comments
G-01	Full test coverage: Functional, UI/UX, Security, Load		
G-02	Mobile breakpoint testing (360px, 768px, 1024px)		
G-03	Browser compatibility: Chrome, Safari, Firefox, Edge		
G-04	Technical documentation delivery		
G-05	CMS & Admin manuals		
G-06	AI configuration manual		
G-07	Source code repository access (e.g., Git)		

H. SUPPORT & MAINTENANCE (AMC)

Req. ID	Requirement Description	Vendor Feedback (FC/PC/NC/NA)	Comments
H-01	Monthly/Quarterly security patch roll-out		
H-02	SLA compliance as per RFP		
H-03	Issue Response & Resolution based on severity		
H-04	Bug fixing & optimization support		
H-05	90-day post-go-live warranty support		

ANNEXURE – B: FINANCIAL PROPOSAL TEMPLATE

To
Chairman, Procurement Committee
Prime Bank FinTech Ltd.

Subject: Financial Proposal for website development and annual maintenance.

Item/Specification	Price (Including VAT) (Taka)
Website Development Amount	(Put Price)
Maintenance Amount	(Put Price)
Per man day cost for CR (Change Request)	(Put Price)
Total Taka	**(Put Price)**
Total Taka (In word)	**(Put Price)**

Payment Mode & Other Terms & Condition:

- **Payment Terms**
  - 20% Upon design approval
  - 30% Upon UAT sign-off
  - 30% After go-live +
  - 20% after warranty period
- **VAT & TAX :** Vendor's pricing must be VAT & TAX inclusive
- **Delay Penalty**: 1% penalty per week of delay, up to 20% of contract value
- **Warranty Period**: 90 days warranty after go-live.
- Annual maintenance price will be paid half yearly postpaid basis

Yours sincerely,

ANNEXURE – SLA : SERVICE LEVEL AGREEMENT FOR PBFTL WEBSITE DEVELOPMENT & AMC

1. Purpose of the SLA

This Service Level Agreement (SLA) outlines the minimum service standards, response requirements, performance benchmarks, and operational commitments that the selected vendor must meet while providing development support, post-go-live maintenance, and annual maintenance services to Prime Bank FinTech Limited (PBFTL) for the PBFTL Official Website.

The SLA applies to the production environment, staging/UAT environments, backend systems, CMS, and any integrated services that form part of the solution.

2. Scope of Services Under SLA

The vendor shall ensure continuous operational support for the PBFTL website covering the following areas:

- Monitoring and maintaining website availability and performance
- Timely resolution of incidents, bugs, and functional issues
- Deployment of security patches and updates
- Support for CMS-related issues
- Performance optimization, caching, load tuning
- AI chatbot and semantic search troubleshooting
- Hosting-level maintenance (if managed by vendor)
- Emergency support for critical issues
- Monthly health checks and reporting
- Ensuring compliance with PBFTL and Bangladesh Bank ICT guidelines

3. Severity Levels & Response Standards

3.1 Severity Classification

Severity Level	Definition
Critical (Severity 1)	Complete website outage, security breach, or core functional failure impacting all users.
High (Severity 2)	Major functionality disrupted; B2B forms, Help Hub, AI Search, or high-impact modules malfunctioning.
Medium (Severity 3)	Partial feature malfunction, localized issues, non-critical bugs, minor layout/UI errors.
Low (Severity 4)	Cosmetic issues, content alignment, minor backend optimization tasks, general enhancements.

3.2 Response & Resolution Time

Severity	Maximum Response Time	Maximum Resolution Time
Critical (S1)	30 minutes	4 hours
High (S2)	2 hours	1 day
Medium (S3)	4 hours	3 days
Low (S4)	8 hours	7 days

4. Performance & Availability Requirements

Performance Metric	SLA Target
Website Uptime	Minimum **99.5% uptime** per month
Incident Response Compliance	≥ 95% cases must meet response SLA
Incident Resolution Compliance	≥ 90% cases must meet resolution SLA
Backup Frequency	As per hosting policy; recommended daily full backup
Security Patch Deployment	Monthly or as per PBFTL/Regulator instruction

5. Maintenance Activities Under AMC

The vendor will be responsible for the following ongoing activities:

5.1 Corrective Maintenance

- Fixing bugs or system errors
- Content-related technical fixes
- AI search/chatbot troubleshooting
- Repairing broken links, forms, or integrations

5.2 Preventive Maintenance

- Monthly health checks
- Performance tuning and optimization
- Cache rebuild, CDN tuning
- Security scanning & patching
- Reviewing logs for anomalies

5.3 Adaptive Maintenance

- Updates required due to browser/device changes
- Adjusting components due to API changes

- Updating libraries and frameworks

5.4 Support Windows

- Critical issues: **24/7 availability**
- High, Medium & Low: **Business hours support**
- Weekend support for deployment (as required)

6. Reporting Requirements

The vendor must submit:

Report Type	Frequency	Description
SLA Monthly Report	Monthly	Incident log, downtime, SLA compliance percentage
Security Report	Quarterly	Patch logs, vulnerabilities fixed, hardening activities
Performance Report	Monthly	Response time, load metrics, Lighthouse score overview
Change Log	Ongoing	Details of updates, configurations, deployments

PBFTL reserves the right to request additional reporting at any time.

7. SLA Penalties & Non-Compliance

To ensure service quality, the following penalties will apply:

Condition	Penalty
Failure to meet SLA (per incident)	1% deduction from AMC invoice
Failure to meet uptime requirement	2% deduction from AMC invoice for each 0.1% below target
Repeated SLA breach for 3 consecutive months	PBFTL reserves the right to terminate the AMC or invoke penalty clauses
Delay in scheduled deliverables	1% per week delay, up to a maximum of 20% of the contract value

Penalties may be adjusted subject to PBFTL Management decision.

8. Exclusions

The following activities fall outside the scope of standard SLA and shall require a **Change Request (CR)**:

- New features beyond the original RFP scope
- Major architectural changes or technology upgrades
- Third-party integrations not included in the original agreement
- Hosting provider migration (if applicable)
